Cornerstone is Laid at Deming

All Lodges Participate in the Ceremony at the New Courthouse.

Deming, N. M., May 31.—The secret corner of Deming, laid by the Masons, had in charge the laying of the cornerstone of the new county courthouse yesterday afternoon. It was a very impressive service. The Masons, the K. of P.s, the Odd Fellows and the Red Men led by the Deming brass band headed the procession to the building at the head of Silver Ave. Judge Walton of Silver City, made the address on behalf of the Masons, and the other orders were represented by members of the local lodges.

Mr. Jas. R. Wadell was the orator of the occasion and made a very eloquent address, picturing in glowing terms the achievements of the men who had carried forward the work of developing the resources of this apparently desolate region. The speech was in part devoted to commemorating the heroes of '61, the occasion was of a two-fold nature—the laying of the cornerstone and the observing of Decoration day. The audience went from the courthouse to the cemetery, where the graves of the old soldiers were decorated.

FRESH AT NIGHT.

If One Uses the Right Kind of Food.

If by proper selection of food one can feed strong and fresh at the end of a day's work, it is worth while to know the kind of food that will produce this result.

A school teacher out in Kans. says in this connection:

"I commenced the use of Grape-Nuts food five months ago. At that time my health was so poor that I thought I would have to give up my work altogether. I was rapidly losing in weight, had little appetite, was nervous and sleepless, and experienced almost constantly a feeling of exhaustion.

"I tried various remedies without good results; then I determined to give particular attention to my food, and have learned something of the properties of Grape-Nuts for rebuilding the brain and nerves.

"I commenced using Grape-Nuts and have since made a constant and rapid improvement in health, in spite of the fact that this time I have been engaged in the most strenuous and exacting work.

"I have gained twelve pounds in weight and have a good appetite, my nerves are strong and I sleep sound. I have such strength and reserve force that I feel almost as strong and fresh at the close of a day's work as at the beginning.

"Therefore, using Grape-Nuts I was troubled much with weak eyes but my vitality increased the eyes became stronger.

"I never heard of food as nutritious and economical as Grape-Nuts."

Read the little book, "The Road to Well-being," in pkgs. "There's a Reason."

VISITS EL PASO AFTER CLOSING BIG DEAL

Man Who Bought the Big Sugar Plantation in Sonora is an El Paso Visitor Monday.

In this land of magnificent distances, a deal involving 75,000 acres does not create the excitement it would in the United States. But a \$3,500,000 deal in Mexican currency is what Nason Rhodes, Jr., who was in El Paso Monday, has just completed in Sonora, Mexico. The land which was purchased by Mr. Rhodes, representing a company of Los Angeles men in sugar land of the most valuable productive power and there are 6000 acres of it under cultivation at the present time.

The land was purchased from the Alameda Sugar Refining company, which is composed of the three Alameda brothers, and the company taking over the holdings is the Sonora Land company, of which Mr. Rhodes is general manager. The plantation and mills are located 20 miles below Culiacan in the valley of the Culiacan river. A canal, to cost \$300,000 gold, is being built from the river to irrigate this tract and it will all be put under cultivation at once.

The Sonora company plans to develop one of the largest sugar plantations in the country on the Alameda ranch and will develop the agricultural resources of the Sonora country.

STATISTICS REGARDING CHURCH POPULATION.

Catholics in Majority in Large Cities. Protestants in Small Cities—Percentage of Communicants.

Washington, D. C., May 31.—The aggregate number of 32,935,470 communicants or members of all religious denominations in continental United States was reported for 1908, according to the U. S. census of religious bodies for that year, as detailed in part I of the U. S. census bureau's special report on the subject, now in press. Of this grand total the various Protestant bodies reported 20,287,142 and the Roman Catholic church, 12,648,328.

For purposes of comparison the census authorities divided the principal cities into four classes, those having in 1906 a population of 250,000 and over, constituting the first class. The number of members of the Roman Catholic church reported in cities of the first class was considerably more than double the number reported by all the Protestant bodies, while outside of the principal cities the number reported by the Catholics was only a little over one-third of the number credited by the Protestants.

Only two of the Protestant bodies reported a majority of their membership in the principal cities, i. e., the Church of Christ, Scientist. The majority of members of other churches live in the smaller towns.

The cities showing the largest proportions of Protestant communicants are Memphis, 84.4 percent; Toledo, 78 percent; Washington, 66.9 percent; Kansas City, Mo., 66.2 percent, and Indianapolis, 62.1 percent.
